MADISON COUNTY EQIP CONSERVATION PRACTICES
FY2005

Code	Practice Name	C/S	Restrictions
575	Animal Trails and Walkways	*	Limited to the movement of livestock between pastures as a part of a prescribed grazing program.
		*	
332	Contour Buffer Strips	*	Per Acre Not allowed where practice has already been adopted or where cost-share has previously been received.
340	Cover Crop	$20 flat rate	Grazing controlled to prevent overgrazing and maintain cover for erosion control. Limited to 100 acres
342	Critical Area Planting	*	No restrictions
362	Diversion	*	Must have adequate outlet.
647	Early Successional Habitat Development/Management	*	If used in a pasture or hay field where bermudagrass is present, herbicides to control must be applied.
382	Fence	*	Cost-share is limited to 50% of the cost of 4 strands of barbed wire or power fence for cross fencing. Where perimeter fencing is required to install a conservation practice, cost-share is limited to 50% of the cost of 4 strands of barbed wire or power fence. This does not apply to repairing or replacing existing fence.
386	Field Border	*	Tame grass species for filtering sediment and turning area for tractors. For establishing and managing wildlife field borders to provide food and cover for bobwhite quail.
393	Filter Strips		No restrictions
512	Pasture and Hayland Planting	*	Cost-share for fertilizer and lime according to soil test. *Recommend soil test at time of application so cost estimate reflects actual needs.
412	Grassed Waterway	*	No restrictions
561	Heavy Use Area Protection	*	No restrictions
422	Hedgerow Planting	*	Limited to areas that will benefit the Bobwhite Quail or T&E species.
468	Lined Waterway or Outlet	*	No restrictions
472	Livestock Exclusion	*	No restrictions
484	Mulching	*	This practice is a support practice to other conservation practices such as critical area planting, earthmoving, etc.
512	Pasture and Hayland Planting	*	Cost-share for fertilizer and lime according to soil test. *Recommend soil test at time of application so cost estimate reflects actual needs.

MADISON COUNTY EQIP CONSERVATION PRACTICES
FY2005

Code	Practice Name	C/S	Restrictions
516	Pipeline	*	Cost-share authorized for water supply for livestock only.
378	Pond	*	As part of rotational grazing and/or exclusion only
		*	
391A	Riparian Forest Buffer	*	No restrictions
350	Sediment Basin	*	Must significantly reduce erosion or needed for compliance of HEL provisions. Cost-share limited up to 15" pipe design.
574	Spring Development	*	For livestock water supply only. Cost-share is limited to least cost alternative of pond, well, or spring development.
728	Stream Crossing	*	BMP's must be used during construction to minimize erosion and water quality impacts.
600	Terrace	*	Must have stable outlets. Underground outlets should empty into grass buffers prior to entering water course.
612	Tree/Shrub Establishment (Other than Longleaf)	*	Limited to riparian forest buffers, conversion of cropland, water disposal areas and silvopasture.
574	Spring Development	*	For livestock water supply only. Cost-share is limited to least cost alternative of pond, well, or spring development.
728	Stream Crossing	*	BMP's must be used during construction to minimize erosion and water quality impacts.
600	Terrace	*	Must have stable outlets. Underground outlets should empty into grass buffers prior to entering water course.
612	Tree/Shrub Establishment (Other than Longleaf)	*	Limited to riparian forest buffers, conversion of cropland, water disposal areas and silvopasture.
620	Underground Outlet	*	Must be part of a water disposal system
472	Use Exclusion	*	Limited to exclusion from sensitive areas where potential water quality problem.
642	Water Well	*	Limited to providing water for livestock. Cost shares limited to the least cost alternative between spring development, pond, or well and troughs.
614	Watering Facility	*	Limited to providing water for livestock.

* Maximum Cost-Share rate as approved by State Conservationist
